The Brand

EVAANNA creates functional art objects in Budapest using traditional metalsmithing techniques embracing heritage, making things that last.

The brand has two missions: functionality and art. The objects are designed to be comfortable grabbing them; with their soft shape they fit perfectly in your grip. They are made of solid brass and bronze which will serve you for a lifetime. Aesthetics is another important element: do the objects you surround yourself with give you joy and inspiration? Maybe you never looked at knobs and handles as a possibility to be inspired, but you should. We often underestimate the influence of little things, but even the smallest details can define how you feel yourself in that place.

EVAANNA is encouraging you to make conscious choices: choose long-lasting pieces that elevate your personal space.

The Maker

I'm Eva Anna Gulacsi,
an architect and
metalsmith based in
Budapest.

I studied traditional jewelry making, but I was always more interested in creating something for our home. In a world of mass production I find great value in the imperfect beauty of handmade things. I make every object myself so that I can make sure that the finished product looks and behaves exactly how I envisioned it.

In a way I'm still making jewelry, jewelry for the home.

The Materials

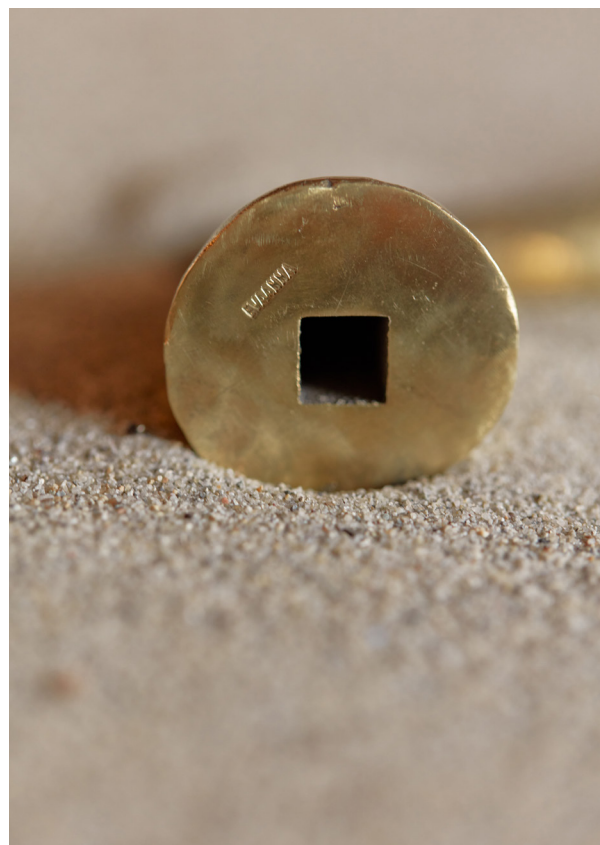

I use brass and bronze for my objects. These materials are very similar, they are copper alloys, the reason why I use both is their difference in color.

Brass has a golden, more elegant vibe whereas bronze has a warm brown hue. I don't believe in plating and different finishes, it always wears off over time.

Every object is made with a living finish, meaning that as the product ages, it will naturally develop a darker color due to oxidation and create a beautiful patina. The pieces are intentionally unlacquered, because beside that I love the feeling of the raw metal, I like the idea that these objects age like us human beings, and it should not be mistaken for flaws. Not to mention that these materials are antibacterial, but that only works if the materials are raw, unlacquered and unplated.

The Process

I start the design process by making models in clay, shaping it with my hands.

Then the clay models are sand cast in solid brass or bronze. This technique, where molten metal is poured into a sand mold, dates back thousands of years. After casting, the objects are sanded and polished by hand, leaving the grains of sand and the air bubbles visible in the finished piece.

I drill the pieces one by one, make threaded holes, then punch the EVAANNA logo in every object. It is a time-consuming and complex process, embracing traditional techniques and making things that last.

In this materialistic
and overcrowded world
surround yourself only
with things that last.

It is the simplest form of sustainability:
do not generate waste, invest in pieces that last a lifetime
both emotionally and physically. My objects strive to
achieve that physically: solid brass and bronze are durable,
rustproof and antibacterial. Without any coating that could
wear off throughout the years, but with a living finish that
creates a beautiful patina. Emotionally: the sculptural form
and the raw, textured surface coming from the sandcasting
method, finished by hand mean every piece is slightly
different and unique.

Sustainability

F.A.Q.

How long does it take to manufacture
the products?

In stock items will be shipped out within 4-5 business days. If items are not in stock, lead times are approximately 4-6 weeks.

Where do you ship?

We ship worldwide.

How should I install the handles?

The door lever comes without a rosette and locking mechanism so it can only be installed in new doors. It comes with a standard 8x8 spindle and it can be installed in doors with a thickness of 40-50 mm.

The sliding door handle is fixed with two M4 screws and grub screws, it can be installed in doors with a thickness of 40-50 mm.

If you have a door with a different thickness, please contact me before placing your order for a special spindle/screw.

Is EVAANNA available for special
commissions?

I am open for collaborations with other design professionals,
please contact me for inquiries.

How should I take care of my
EVAANNA object?

Brass and bronze doesn't require any maintenance and it will serve you
for a lifetime. Clean with mild soap and water, do not use abrasive or chemical-
based cleaners.

How should I install the knobs/
hooks?

The knobs come with an M4 screw which is the common screw for knobs, it can
be installed in any furniture. You will also receive a dowel screw for installing
the knob as a wall hook – it is an invisible fixing method.

What does it mean that each piece
is different?

Due to the use of living finish and hand casting, items have a natural variation.
Slight differences in color or texture are to be expected. In a world of mass
production I find great value in imperfections and individuality.
Variations are not defects. If your object is defective or damaged in other ways,
please contact me and I will try my best to help.

The Pinch Collection

Inspired by the human touch, the soft shapes of the Pinch Collection gently stimulate our senses. Feel the organic textures when grabbing them, the knobs and handles fit perfectly in your grip. All shapes have a different character, but they complement each other perfectly when used together.

Choose the large knobs for making a statement or the small ones for a more subtle look, the Pinch hardware series is here to add refinement to your home.

The Soft Pinch small knob was the first design making it to the collection, with its graceful utility this knob adds refinement to your home. Because of its asymmetrical nature it looks great being used repetitively, but you can mix it with the other small knobs of the collection for an even more original look.

Purpose: Use it as a knob or a wall hook. Screws for both options are included.

Making: Shaped by hand in clay, cast from solid brass or bronze and finished by hand in Budapest. Because of the manufacturing process each piece is slightly different, it should not be mistaken for flaws.

Finish: Living finish, meaning that as the product ages, it will naturally develop a darker color due to oxidation and create a beautiful patina over time.

Material Choices: Solid bronze or brass.

Dimensions: L 50 mm x W 27 mm x H 33 mm

Soft Pinch Small Knob/Hook

Tough Pinch Small Knob/Hook

With its delicate proportions and flowy character the Tough Pinch small knob elevates your personal space. Use it as a cabinet knob or as a wall hook, it will bring a touch of elegance to your space.

Purpose: Use it as a knob or a wall hook. Screws for both options are included.

Making: Shaped by hand in clay, cast from solid brass or bronze and finished by hand in Budapest. Because of the manufacturing process each piece is slightly different, it should not be mistaken for flaws.

Finish: Living finish, meaning that as the product ages, it will naturally develop a darker color due to oxidation and create a beautiful patina over time.

Material Choices: Solid bronze or brass.

Dimensions: L 52 mm x W 32 mm x H 28 mm

The Subtle Pinch complements the other small knobs, they are all different and unique, but fit perfectly together. A timeless and versatile piece that brings joy to your everyday life.

Purpose: Use it as a knob or a wall hook. Screws for both options are included.

Chunky Pinch Large Knob/Hook

Tender Pinch Door Lever

The Tender Pinch door lever is a very special handle: it is a sculpture made of one solid block of brass or bronze, designed without a rosette. With its flowy character and poetic shape this door lever will be an eye-catching detail in your home.

- Making:** Shaped by hand in clay, cast from solid brass or bronze and finished by hand in Budapest. Because of the manufacturing process each piece is slightly different, it should not be mistaken for flaws.
- Finish:** Living finish, meaning that as the product ages, it will naturally develop a darker color due to oxidation and create a beautiful patina over time.
- Included:** 1 pair of handles with spindle and screws. Optional thumbturn lock.
- Warning:** Not suitable for pre-drilled doors. Designed for doors without locking mechanism.
- Material Choices:** Solid bronze or brass.
- Dimensions:** L 33 mm x W 133 mm x H 60 mm

The Gentle Pinch long knob is a special one - it is fixed with two screws to prevent rotation, but the screws are placed next to each other to maintain the handle's sculptural nature. Install vertically for wardrobe doors or horizontally for long drawers, it will feel like a handshake of the place.

Making: Shaped by hand in clay, cast from solid brass or bronze and finished by hand in Budapest. Because of the manufacturing process each piece is slightly different, it should not be mistaken for flaws.

Finish: Living finish, meaning that as the product ages, it will naturally develop a darker color due to oxidation and create a beautiful patina over time.

Material Choices: Solid bronze or brass.

Dimensions: L 148 mm x W 33 mm x H 44 mm

Gentle Pinch Long Knob
